

## Charting the SEAS: An Index of Faculty Research

For the final project, I want to illustrate the progress that Penn Engineering professors are making in their respective fields. By including information about each faculty member's current work, areas of interest, publication history, and academic accomplishments, I hope to show that knowledge is continuously growing in many areas of science—especially at a research university like Penn.

### Data sources

- SEAS faculty directory
- Individual profiles/websites of faculty members

### Bibliography

- [SEAS Website](#)
  - *Data Flow: Visualising Information in Graphic Design* from gestalten
- 

### Alternate project ideas and interests

- Visualization of Penn's finances
- Worldwide immigration and emigration patterns
- Imports, exports, and the flow of food within the U.S.
