Title:

Solar Power

Description:

I would like to do research on the use of solar power in the US and how it has grown over the past five years (especially how it has been effected by milestones in legislation). I would like my representation to involve multiple elements (maps, charts, symbols, etc) to illustrate the different elements of information known to us on the topic.

Data sources:

US Energy Information Administration: <http://www.eia.gov/opensdata/>

SEIA (Solar Energy Industries Association): <http://www.seia.org/research-resources>

Resources:

Melanie Cedrone, the Earth and Environmental Science library specialist.
